## We Fit Your Lifestyle

Flow-Rite marine products are perfectly suited for your recreational pontoon boats. Our comprehensive suite of high performance products is ideal for both livewell/baitwell applications as well as internal grey water plumbing needs. Flow-Rite livewell/baitwell plumbing solutions feature steady aeration so you can fish knowing your bait and your catch will be kept safe and healthy allowing you to fish and play throughout the day.

From our on-board drains to your plumbing systems, we designed products to meet your grey water plumbing needs for built-in sinks and bars. Trust Flow-Rite's premium parts, such as our patented Qwik-Lok™ system, to keep your pontoon boat's plumbing systems flowing smoothly.

## What is Qwik-Lok?

Qwik-Lok™ is a quick connect/disconnect marine plumbing system that can provide increased productivity and greater value while simultaneously reducing costs. Qwik-Lok is manufactured using high-quality materials and is made in the USA for worry-free peace of mind.

At the heart of every Qwik-Lok system is the innovative Qwik-Lok socket that fits industry standard marine hose in popular **3/4"**, **1-1/8"**, and **1-1/2"** sizes. Qwik-Lok's numerous benefits make it much more than just a quick plug-and-play plumbing system.

## 'Fitting' Your Needs

The Flow-Rite parts are as good as they get!

— Chad Pipkins, Professional Bass & Elite Series Angler

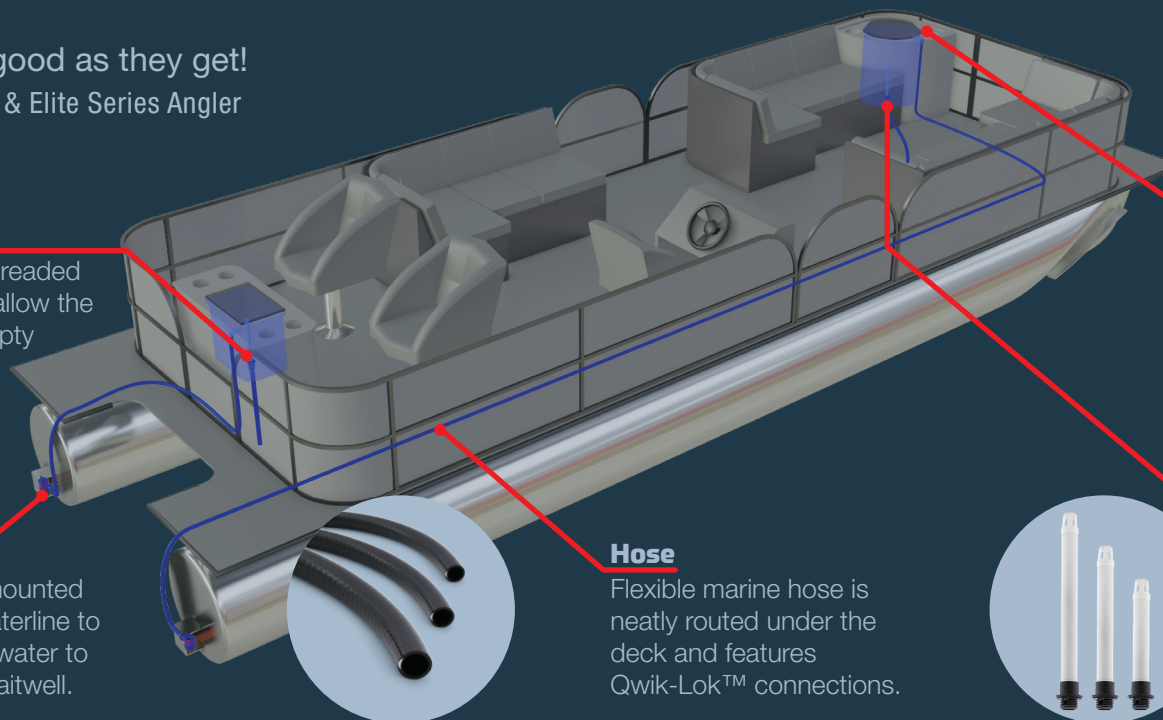

### Drain

Flow-Rite's threaded drain fittings allow the livewell to empty completely.

### Pump

Pumps are mounted below the waterline to supply fresh water to the livewell/baitwell.

### Hose

Flexible marine hose is neatly routed under the deck and features Qwik-Lok™ connections.

### Aerator

Flow-Rite Venturi aerators provide ample oxygen as well as a directed current to keep your fish happy and healthy.

### Standpipe

The standpipe keeps water level at the desired depth.
