

Locomotive Battery Care

Single Point Watering System

Low profile fits battery compartments

Acid-resistant polypropylene components and tubing

Maintaining proper water level in your battery will keep it running efficiently and at a power level to meet the needs of a demanding locomotive environment. The system consists of automatic shut-off valves, interconnected with tubing, that replace the existing vent caps. A quick coupling allows the system to be connected to a water supply. Once connected, water flows into each cell until it reaches the correct level. A flow indicator built into the water supply tells the operator when filling has been completed.

Benefits to You Include:

- Quick installation
- Easy and efficient single point watering including those hard to reach cells
- Automatic shut-off valves ensures the cells are filled to the correct level, every time
- Saves time/money
- Proper care ensure batteries run efficiently
- Easy-to-tighten "winged" valve
- Internal flame arrestor for improved safety
- Easy battery watering without having to remove vent caps; avoiding acid burns, ruined clothing, and minimizes noxious fumes

Locomotive Battery Single Point Watering System

Approved Water Supplies

PORTABLE WATERING CART

Benefits:

- Ergonomic, upright design eliminates a user bending down
- Dedicated hose wrap notches
- Easy access spray bottle holders
- AC/DC powered

Portable watering cart	BA-MS-115
------------------------	------------------

REGULATED HOSE SUPPLY

Benefits:

- Regulator provides safe and steady water pressure
- Connects directly to a standard garden hose bibb
- Allows for fast filling

Regulated hose supply w/ 20' hose	BA-MS-320-20
-----------------------------------	---------------------

Regulated hose supply w/ 5' hose	BA-MS-320-05
----------------------------------	---------------------

WATER SUPPLY CONVERTER

Benefit:

- Converter when using a Flow-Rite SPW system

Water supply converter	BA-013
------------------------	---------------

Distributed by:

DEIONIZER

Benefits:

- Removes dissolved solids from tap water
- Uses ion exchange cartridge filled with non-toxic synthetic resins
- Light indicator advises need to replace cartridge

Deionizer, Battery Operated	BA-MS-340
-----------------------------	------------------

Replacement Cartridge	BA-221
-----------------------	---------------

PORTABLE WATER SUPPLY

Benefits:

- Convenient water supply to mount on a wall
- Automatically shuts off when filling stops

Portable water supply, 120 V AC powered	BA-MS-606
---	------------------

Portable water supply, DC powered	BA-MS-612
-----------------------------------	------------------
